

Last week I spoke at the Rotary Club in my hometown of Hazleton about the debt crisis crippling our Nation. The Rotarians were engaged, attentive, and concerned about the spending habits of Washington.

Madam Speaker, I let them know that we have a debt crisis in this country, not because Washington taxes too little, but because Washington spends too much. For far too long, the Federal Government has overspent, overtaxed, and over-borrowed. That stops now.

If we are serious about our economic prosperity, we must cut wasteful spending in favor of investments proven to work. Last week I visited the SHINE 21st Century After-School Program at Panther Valley Elementary School in Nesquehoning. Located in 10 schools in Carbon and Schuylkill Counties, SHINE is a data-driven, rural education model designed to provide academic enrichment to at-risk students. I commend Jeanne Miller, Director of the SHINE Program, and Lehigh-Carbon Community College for partnering together to benefit pre-service teachers and, more importantly, some of our region's most deserving students. Like the D.C. Opportunity Scholarship Program, the SHINE model stands out as a program that works.

As a member of the House Committee on Education and the Workforce, I will continue to examine how education at all levels is preparing students for careers. I was privileged last week to welcome Chairman KLINE and the House Education and the Workforce Committee to Wilkes University in Wilkes-Barre for a field hearing on the role of higher education in job growth and development. Witnesses from Wilkes University, Empire Beauty School, Luzerne County Community College, and Lackawanna Junior College demonstrated firsthand how northeast Pennsylvania is taking strides to provide quality higher education.

Additionally, Chairman KLINE and I met with and read to a kindergarten class at Riverside Elementary East in Moosic. The reception we received from all of the students was unbelievable, and I couldn't be more appreciative of the students, teachers, and school administrators for putting such a fantastic visit together.

Also, last week I welcomed Chairman MICA, Subcommittee Chairman Shuster, and the Transportation and Infrastructure Committee to Scranton for a listening session on the future of our roads and infrastructure. The listening session helped me and other members of the committee gain a greater level of insight from local leaders with expertise and real world experience in transportation and infrastructure policy. During the listening session, we spoke about job creation, heard some examples of burdensome regulation, listened to ideas about cost-effective maintenance plans, and were briefed on public-private partnerships as new ways to build and repair Pennsylvania's roads and bridges.

Madam Speaker, the challenges we face in our district are great, but they are not unique. My friends and neighbors in Pennsylvania's 11th Congressional District are hardworking people, and I will continue to bring their voices to Washington throughout the 112th Congress.

Finally, Madam Speaker, in closing, I would like to note that we're all here today, free to talk and debate, because of the brave men and women serving in our Armed Forces. I was humbled and honored this week to attend the Purple Heart medal presentation in Hazleton to Pennsylvania Army National Guard Sergeant First Class John Leonard.

Sergeant Leonard was injured in an IED explosion in Iraq in February. It is men and women like Sergeant Leonard who make me proud to be standing freely in this House Chamber today.

KOREA-U.S. FREE TRADE AGREEMENT

The SPEAKER pro tempore. The Chair recognizes the gentleman from Maine (Mr. MICHAUD) for 5 minutes.

Mr. MICHAUD. Madam Speaker, I rise today to speak in opposition to the Korea Free Trade Agreement.

The Korea FTA is fundamentally flawed. As everyone knows, it is the same NAFTA-style agreement that hasn't worked for 17 years. This agreement will further undermine U.S. manufacturing and ship more American jobs overseas. But there are things the American people don't know about this trade deal, things that the administration hopes that they will not find out.

The administration will say that this agreement is key to increasing U.S. exports. But what they don't say is that it also increases Korea's imports, too, which will expand our trade deficit by hundreds of millions of dollars each year and cost us 159,000 American jobs.

It will also result in more under-priced goods from China being transhipped through Korea and being dumped in the United States.

The administration will say that this trade deal is important for U.S. national security. But what they don't say and talk about is the potential for it to benefit North Korea through the Kaesong Industrial Complex.

And the administration will say that they fixed the auto provisions and opened up Korea's market to all U.S. companies. But what they don't mention is the fact that they only fixed the auto provisions on paper, not in reality, and this is still a bad deal for the United States companies here in the U.S.

They don't tell the American people that this free trade agreement does nothing to stop Korea's currency manipulation. But the Treasury Department actually identified Korea as a currency manipulator in their report this February.

I have come to the floor today to make sure the American people are

aware of how bad this trade deal is for the United States and how good this FTA is for China, Kim Jong Il, and South Korea.

I would urge my colleagues on both sides of the aisle to oppose this flawed NAFTA-style trade deal.

H.R. 910, THE "DIRTY AIR ACT"

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) for 5 minutes.

Mrs. CHRISTENSEN. Madam Speaker, I rise to speak out against the GOP energy agenda and H.R. 910, the Dirty Air Act.

While consumers around the Nation, including my district of the Virgin Islands, are struggling to make ends meet amidst the rising cost of energy, our colleagues across the aisle are shamelessly using scare tactics to cripple EPA's regulatory authority and gut the Clean Air Act.

H.R. 910, the Energy Tax Prevention Act, or more appropriately, the Dirty Air Act, will reverse generations of scientific advancement and does nothing to protect the everyday American. In fact, the legislation outright denies the science that clearly demonstrates that greenhouse gases are injurious to health and that they accelerate global warming. This is science that the Congress has paid for.

The Academy of Sciences, a committee of many of the world's leading climate scientists and others, make the indisputable health link that these gases are injurious to our health. So I want to speak out against that agenda. As the President has recently said, we have got to work together to secure America's energy future.

The only ones who benefit from this legislation will be those who already benefit, Wall Street oil speculators and Big Oil allies here in Congress. This is nothing more than polluted politics. The American people deserve better. Let's save American jobs, invest in the green economy, and ensure a clean, not a dirty, future for the children of tomorrow.

Madam Speaker, I rise to speak out against the GOP energy agenda and H.R. 910, the Dirty Air Act. While consumers around the Nation, including my district of the Virgin Islands, are struggling to make ends meet amidst the rising cost of energy, our colleagues across the aisle are shamelessly using scare tactics to cripple EPA's regulatory authority and gut the Clean Air Act.

H.R. 910, the Energy Tax Prevention Act or more appropriately, the "Dirty Air Act" will reverse generations of scientific advancement and does nothing to protect the everyday American.

In fact the legislation outright denies the science that clearly demonstrates that greenhouse gases are injurious to health and that they accelerate global warming. This is science that this Congress paid for. The Academy of Science, a committee of many of the world's leading climate scientists and others make the indisputable health link, not the EPA

administrator, yet the Republicans think they know better, or at least want the public to think so.

Well I live in a place with very high GHG emissions from both our oil refinery and public utility and we are seeing increases in asthma and the severity of it, even deaths, as well as of certain cancers. They cannot tell my constituents that those gases are not harming our health. My constituents and I believe all Americans want them regulated, we want to be healthy and we want our children's health to be protected. These gases must be regulated for the benefit of this and future generations.

The gases are clearly linked to respiratory and other diseases. All who study the impact of global temperature rise, using sound science, predict not only an increase in respiratory diseases but also heart disease and others.

This legislation is not the only attack on regulations that seek to reduce negative impacts on our health or slow down climate change and prevent us from starting the new green revolution that will create jobs and revitalize communities and our economy. All of the Republican CRs include cuts that would hinder EPA from implementing regulations that protect our health. We must not make cuts that destroy our ability to protect our health and our environment.

Without a doubt, the only ones to benefit from H.R. 910 and the Republican cuts will be those who already benefit—Wall Street oil speculators and big oil allies here in Congress. As the President said recently, "We've got to work together to secure America's energy future." H.R. 910 is not a step in the right direction. This is nothing more than polluted politics. The American people deserve better. Let's save American jobs, invest in the green economy and ensure a clean—not dirty future for the children of tomorrow.

H.R. 471, D.C. SCHOOL VOUCHER BILL

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. CHU) for 5 minutes.

Ms. CHU. Yesterday, House leadership pushed through H.R. 471. I voted "no" because it does nothing to create jobs, hurts public education, and adds to the national deficit.

We have been back to work in the House for 13 weeks, and for 13 straight weeks the Republican majority has done nothing to create jobs. They haven't even put a single jobs bill on the House floor. In fact, their proposed spending bill actually costs America 700,000 jobs.

Now, Speaker BOEHNER has brought his own pet project bill to the House floor that imposes his desire to privatize public education in the District of Columbia, and he doesn't even represent the District. This bill would reauthorize the failed Washington, D.C., private school voucher program and open it to new students, funneling millions in new Federal spending to private schools at taxpayer expense. And yet, for the last 5 years, the voucher program has proven to be flawed and ineffective.

The voucher program has not been successful in raising student academic

achievement. It has had no impact on student motivation and engagement. The program has had no effect on student satisfaction with their schools or on whether students view their schools as safe and orderly. And voucher students were less likely to have access to important services, such as programs for English language learners, programs for students with learning problems, counseling, and tutoring. Vouchers are an experiment that has been tried and has failed.

This anti-education bill comes at a time when the Republican leadership is proposing drastic reductions in Federal spending, including a House-passed bill slashing billions from core education programs. Vouchers are not real education reform. They don't solve problems. They ignore them.

Rather than offering an empty promise for a few, we should be ensuring that every child has access to a great public school. And instead of taking money out of public schools for private schools, Congress should be investing in strategies to improve school achievement. Our focus should be on strategies proven to increase student achievement, such as increasing parental involvement, strengthening teacher training, and reducing class size. And our goal should be to prepare all students for the jobs of the future, not to allow a few students and parents to choose a private school at taxpayer expense.

When public schools are struggling and teachers are being laid off, the last thing we need is to spend scarce taxpayer funds on private schools. And that's exactly what this legislation will do. Speaker BOEHNER's bill will increase the deficit by \$300 million, \$300 million that could go towards making sure America's public school students and public school teachers have the resources they need to succeed. Speaker BOEHNER's bill offers no offsets. It is an ideological effort to recreate a program that was ended years ago because it did not work.

It is time for Republicans to stop playing political games with our public education and America's economic future. And so I ask my colleagues across the aisle to join with Democrats to reduce the deficit, protect our public schools, create jobs, and strengthen the middle class.

THE PENDING FREE TRADE AGREEMENTS WITH KOREA, PANAMA, AND COLOMBIA

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Ohio (Ms. KAPTUR) for 5 minutes.

Ms. KAPTUR. Madam Speaker, let me ask Congress, where are you?

America's trade policy is operating as if we were still in the last century instead of the 21st. Time and again, this Congress keeps failing to grasp reality and learn from past failures. Instead, Congress keeps doing more of the same failed approach.

Now, this administration has pledged to soon submit another so-called free trade agreement, this time with Korea. There are even some in Congress who are demanding the President attach no-win agreements to Panama and Colombia at the same time. All of these agreements fail to put America in a position to win economically by creating jobs here in our country.

□ 1040

I want to remind my colleagues that these agreements are nothing more than expansions of the same failed trade policies established by NAFTA. Think about China too. Ever since those two agreements were signed, we have never had a single balanced trade agreement with those countries. These same approaches racked up another half-trillion-dollar trade deficit last year alone and all the lost jobs across our country that were outsourced as a result.

I can assure you that our trade deficits are not getting any better as a result. Year after year, the numbers tell the same story: More job loss resulting from unbalanced trade agreements. America needs reciprocity and balance and equal access to foreign markets, not surrender. Haven't the working people of America paid a high enough price yet with the diminishment of their livelihoods, loss of home values, uprooting of their families, outsourcing of their jobs, collapsed school systems, and constant worry about a more secure future? This is a fight about who is taking away those economic opportunities drop by drop here at home and how we stop the hemorrhage.

More extremist free trade agreements have given us the kind of world we inherited after NAFTA. They told us it would create millions of jobs. Instead, we have seen the manufacturing sector decimated with over 8 million lost jobs. Estimates on the number of jobs lost directly just due to NAFTA with Mexico and Canada are in the millions. Over a third of all manufacturing jobs in the United States have disappeared and been outsourced since its passage.

Our trade deficit with Mexico last year alone was over \$66 billion in the red. That means hundreds of thousands of pink slips in our country. And for what? The Mexican people live in greater misery, while their wealthy have become even wealthier since NAFTA's passage. This is not a recipe for continental stability.

When Most Favored Nation status for China was rammed through here at the end of the 1990s, proponents said it would create jobs across our country. Since then, America has amassed a \$2 trillion cumulative trade deficit with China—trillion—and hundreds of thousands more pink slips in our country, including in the so-called green energy sector, and more loss of production here as China demands businesses set up shop there to do business at all and then gives vast tax holidays. And there
